## TECHNICAL SKILLS

- **Programming Languages:** Java, Erlang, Python, Javascript, Rust, C++, Bash
- **Frameworks & Other:** Firebase, SQLite, NodeJS

## GITHUB PROJECTS

- **jonalmeida/ws-p2p**
  - Peer-to-peer network with causally ordered messages using WebSockets with Rust.
- **jonalmeida/ws**
  - A WebSocket client library written in Erlang.
- **jonalmeida/hack-the-north-crazyflie**
  - Micro-quadcopter controlled with a Leap Motion controller.
- **jonalmeida/AutoTaxi (private)**
  - A self-driving fleet of cars that use A\* to navigate through the streets of a small world.

## PROFESSIONAL EXPERIENCE

- June. 2017 - **Software Engineer**, *Jet.com*, Hoboken, NJ.
- Present
- Released various features on par with other clients (Web/iOS) using our Jet API: referral program, pricing logic, etc.
  - Migration of all the application's modules to Dagger 2 dependency injection; 30% app speed up.
  - Kept consistent and exceptional user experience (**highest rated e-commerce app** in the Google Play Store).
  - Miscellaneous tasks: Team/release management, feature roll-out, new-hire/intern mentoring.
- May. 2016 - **Firefox Mobile Intern**, *Mozilla*, San Francisco, California.
- Aug. 2016
- Designed and created a tab grouping app (demo) for prototyping using machine learning.
  - Developed custom layouts for the homescreen in Firefox for Android to show user activity (image).
  - Helped organize and attended a Design Sprint for location-based prototyping.
- June. 2015 - **Firefox Mobile Intern**, *Mozilla*, San Francisco, California.
- Sept. 2015
- "Click-to-view images" in Firefox for Android to reduce bandwidth usages (onboarding image).
  - Setup a remote device farm for accessing un-used devices for a team spread across multiple offices.
  - Converting Quick Search ListView for more performant RecyclerView.
- May. 2014 - **Software Developer Intern**, *Snowplow Analytics Ltd*, (Remote).
- Aug. 2014
- Created and modularized the Java event tracker; released multiple version updates.
  - Released the iOS and Android trackers, inheriting from the Java core library.
  - Managed and prioritized feature release schedules on GitHub; CI integration, etc.
- May. 2013 - **Software Developer Intern**, *BlackBerry Ltd*, Mississauga, Ontario.
- Dec. 2013
- Single-handedly developed the Notification Settings in Qt (not usually reserved for internship developers).
  - Worked with QA and product teams to re-architecture to the new Settings UI requirements.
  - Implemented deep linking for third-party applications to link to their Settings UI.
  - Created a Jenkins automation build machine to run with Google Test test cases for it.
- May. 2012 - **Software Test Developer Intern**, *BlackBerry Ltd*, Waterloo, Ontario.
- Dec. 2012
- Primary support for remote QA team with issues they would encounter during their testing.
  - Investigation and verification into issues seen on an infrastructure level of development.
  - Mentored junior co-ops on a daily basis with all the above mentioned tasks.
  - Received an employee recognition award for working in multiple war rooms with other teams.

## OTHER PERSONAL PROJECTS

- Held workshops for introductions to Git/version control.
- Technical Reviewer for Global Hackathon Seoul (reviewed 1000+ global applicants).
- Mentored at various hackathons: McHacks, WearHacks, UofTHacks, HackWestern, etc.

## EDUCATION

2016 **Bachelors of Science, Computer Science**, *University of Windsor*.
